

Dear FCC,  
Satellite radio offers choice and convenience across the nation - it is the next natural step in the the progression of radio for the convenienc and the enjoyment of the consumer. I fully support sattellite and enjoy being able to listen to what i want to listen to when I want to listen to it with NO COMMERCIALS or DJ TALK!!!!

Since I pay for the service I believe i should have the right to listen to what I want when I want.

I believe in competition and the free market if the broadcasters are losing listeners they should try look at their programming rather than trying to regulate a much needed and desired service.

Sincerely,

Amy J Yoder
